

ABSTRACT

**Nail varnish composition comprising a block polymer**

The present invention relates to a nail varnish composition comprising, in a cosmetically acceptable medium, at least one particular block polymer, the said composition being free of nitrocellulose and having a mean gloss greater than 50 out of 100.

A subject of the invention is also the use of such a composition to obtain a film, deposited on the nails, which is glossy and which shows good staying power and wear resistance.
